

Dear year 6,

Geography in year 7 at STM is fantastic. The wonderful teachers and the thrilling lessons. There is never a dull moment.

The head of Geography is the marvellous Mr Murray and a further six splendid teachers, so there will always be someone to go to for help. At the end of the year, you get to go on a full day trip, as a detective, to Newcastle's Quayside to investigate how places change. It is a really terrific way to end the year.

During the year you learn about so many tremendous topics, such as magnificent map reading and the extraordinary environment.

Now for the colourful classrooms. They are filled with maps, books, posters, and peoples' wisdom in their wonderful work. Your lessons will never be boring as there are interactive PowerPoints, videos, films and TV shows to get you in the Geography spirit. Your books are also full of colour as you do drawings and 3d folded images.

Basically, you will love it!

From Year 8 student 😊
